

The Self-Development Solution

Self assess and formulate a development plan using a **Learning Profile**.

Build basic competency and knowledge using a **SkillBuilder** booklet.

Review competency process and apply on-the-job using a **One-Page Coach** handout.

Develop complete managerial perspective using a **Manager's Pocket Guide**.

Unlimited Annual Use License for:

24 Learning Profiles

Choose from 17 assessments that diagnose performance in a specific competency such as goal setting, time management, or leadership effectiveness. Seven other assessments produce a style profile in areas including emotional intelligence, learning style, and assertiveness. Assessments can be self-administered using the organizations online account. A comprehensive report is returned instantly to the employee at their work station or at home. The report describes where improvement is needed, provides coaching tips, and a development plan.

35 SkillBuilder Booklets

SkillBuilder booklets provide a 12-page training snapshot that presents the competency in logical steps or stages that are easy to understand and learn. SkillBuilders provide the individual the ability to self pace learning and quickly move to on-the-job practice.

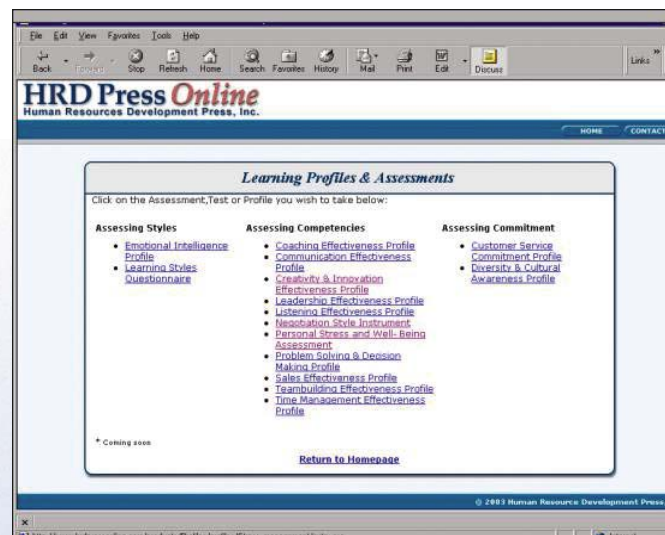

20 One-Page Coach® Handouts

The One-Page Coach handout is a concise distillation of the steps and processes required to execute a competency, all on a single page. The reverse side of the handout provides an application job-aid that enables learners to outline specific actions to improve execution of the competency on the job.

32 Manager's Pocket Guides

There are MPG's for many of the same competency areas covered by Learning Profiles, SkillBuilder booklets, and One-Page Coach handouts. Pocket Guides take a more comprehensive approach to the topic area and provide a view of problems and objectives from a managers perspective. Pocket Guides are ideal for team leaders and can be valuable as a starting point or finishing point for skill and knowledge development.
